

Marshall Team Meeting (MTM)
June 5, 2006

DA01/D. King – Presented an award to UNITEs in recognition of four million hours without a lost-time mishap. Accepting for UNITEs was Dan Harris, Program Manager; Seth Ferrara, Safety Manager; and Jesse Starks, Safety Specialist.

The Constellation Program Rollouts are scheduled for today, June 5 and Friday, June 9. The Center is looking forward to Shana Dale's (NASA Deputy Administrator) visit to Marshall on Friday, June 9. At an all-hands briefing with Center employees that day, she will provide the latest update regarding distribution of Constellation work among the NASA Centers.

Very pleased the Agency has chosen Marshall to manage the Robotic Lunar Exploration Program (RLEP) and Tony Lavoie to lead the program.

The Warren Blank Senior Leadership Team offsite is scheduled for tomorrow, June 6, at the Marshall Institute located at the Space and Rocket Center.

Congratulations to Charles Scales on his appointment as Associate Administrator for the Office of Institutions and Management at NASA Headquarters.

Charles Chitwood is on annual leave this week and will return on June 14.

ED01/P. Allen – Presented a briefing relating to a recent Center slip/fall lost-time mishap.

ASRI/HS01/L. Motley – Presented a briefing on the Center's Employee Assistance Program. Charts used in this presentation are posted at Inside Marshall.

AS10/F. Davis – Presented a status report on the Center's Environmental Management System Audit. Charts used in this presentation are posted at Inside Marshall.

QD50/E. Kiessling – Presented the Center's monthly Industrial Safety Report and a briefing covering the monthly safety topic, Mishap and Close Call Reporting at MSFC. Charts used in the presentations are posted at Inside Marshall.

CS20/D. Amatore – Provided an update on Center upcoming events:

- At noon today, June 5, a special NASA update with the Administrator, Michael Griffin, is scheduled. The program will be broadcast on NASA TV and will be available on the Internet. The Administrator will discuss the distribution of Constellation work among NASA Centers.
- The next Marshall Association (MA) luncheon is scheduled to be held at the Marshall Institute on Tuesday, June 6, at 11 a.m.
- The STS-122 pre-flight media briefing is scheduled for Thursday, June 8, at JSC.
- On Friday, June 9, NASA Deputy Administrator, Shana Dale, and Constellation Program Manager Jeff Hanley will visit the Marshall Center to discuss in more detail the distribution of work among NASA Centers. An all-hands meeting will be held from 9:30 to 11 a.m. in Bldg. 4316.

- The 2006 NASA Honor Award ceremonies will be held in the Morris Auditorium on Wednesday, June 21. The Agency Awards will be presented at 10 a.m., and the MSFC Honor Awards will be presented at 2 p.m.

IS01/J. Pettus – Provided an update on the SAP version upgrade that is due in to be completed in mid-October 2006. Some issues with the data migration from SAP have surfaced. These issues are currently being evaluated/worked and could impact the mid-October completion date.

AS01/J. Carter – Reminded everyone to practice safe driving habits. The Agency recently lost two employees as a result of automobile/bicycle accidents.

MP01/S. Coleman - The Shuttle Propulsion Office is busy preparing for a July launch. The External Tank (ET) 118 ships today, although it will ship with open work on the Engine Cutoff Sensor (ECO) and final shakedown. A Debris Verification Review (DVR) was held last week, and issues from the review are currently being worked. The Shuttle Program conducted a Contingency Simulation last week that went very well. The ET Design Certification Review (DCR) will be held on Wednesday, June 8 at Michoud Assembly Facility. The FRR is scheduled for June 16 and 17.

JP01/D. Dumbacher – The Preliminary Requirements Review (PRR) pre-board on the J-2 engine is scheduled for today, June 5. The board will be held by the end of this week. Also, this week visits are scheduled to Glenn Research Center and Langley Research Center to discuss Constellation roles and responsibilities.

VP01/J. Horack – Tomorrow, June 6, the Science and Mission Systems (S&MS) Office will be hosting Harry Atkins (Raytheon, Inc.) at Marshall. Also, Dr. Melissa McGrath will continue to officially assist with working the lunar program.

ED01/P. Allen – During acceptance testing last week, a gas generator modulator valve failed. An investigation was conducted, and the findings indicate this could possibly become a return to flight issue. The final decision will be forthcoming
